

Introducing **qiskit_algorithms** (0.2)

Algorithms in Qiskit moved to independent package (RFC: <https://github.com/Qiskit/RFCs/blob/master/0012-algorithms-migration.md>)

- New location: <https://github.com/Qiskit-community/qiskit-algorithms>
- New docs: <https://qiskit.org/ecosystem/algorithms/>
- Top new features:
 1. Removed deprecated use of **opflow** and **quantum_instance** → full primitives-based workflow
 2. Re-added short imports for commonly used algs. → `from qiskit_algorithms import VQE`
 3. Migrated and upgraded tutorials from: <https://github.com/Qiskit/qiskit-tutorials/tree/master/tutorials/algorithms>
